Appliance Hose Packaging

December 1, 2014

Trap Blister Construction

Packaging for appliance hoses – Trap Blister Pack

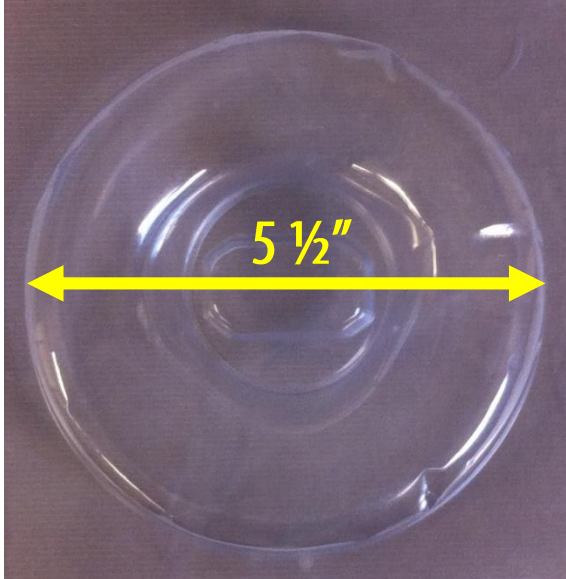

- Three pieces:
 - Front card - (printed one side)
 - Preformed plastic shell
 - Back card
 - Front card and back card are sealed together around the plastic shell holding the appliance hose, trapping the product inside the package.

- Trap blister for the hose that includes fittings, elbows or valves must have a bubble in center to hold them in place

Blister Plastic Shell Diameter

Coil hose to fit into a 5 1/2" diameter shell. Confirm that it can be coiled without damage to fit this diameter.

Color Coding

Color Code

- Ice Maker - PMS#660
- Packaging is color coded by appliance type
 - Easier for the customer to find what they want
